**TIMELESS**  
MEDICAL AESTHETICS

**BOTOX/JEUVEAU/ DYSPOUR:** Botox, Jeuveau, and Dysport are FDA approved aesthetic products that are injected into the facial muscles to stop the contractions that cause wrinkles. They are commonly used to treat forehead lines and crow's feet.

**DERMAL FILLER:** Dermal fillers are gel-like substances that are injected beneath the skin to restore lost volume, smooth lines and soften creases, or enhance facial contours.

**AQUA GOLD:** Aqua gold is a microinjection device that targets fine lines and wrinkles, refines pores, reduces pigmentation, and improves the texture of your skin. It feeds and nourishes the skin from within using specific formulated serums.

**LASER SKIN RESURFACING:** Lasers use light and heat energy to cause controlled damage to the surface of the skin, so that your body reacts to heal the tissue by turning over skin cells. Laser resurfacing treatments are a great way to address fine lines, wrinkles, uneven pigmentation, and enlarged pores.

**PLASMA PEN:** A non-invasive skin tightening and rejuvenation device to help with wrinkles, loss of collagen, and sagging skin. This treatment is based on a series of minute dots adjacent to the tension lines on the skin. This process triggers an immediate tightening, lifting, and remodeling of the skin. This technique is used to stimulate the production of collagen in the skin.

**SMOOTH PDO THREADS:** Smooth threads are placed under your skin in a hashtag pattern which brings back the lost blood flow to the area which will repair and tighten the skin. PDO smooth threads can be used to smooth wrinkled skin by replacing and adding collagen and elastin to damaged areas.

**PROCELL MICRONEEDLING:** This treatment uses tiny needles to create microchannels in the skin to generate collagen production. The patented stem cell serum is applied while these microchannels are open, which helps promote the growth of collagen and elastin. Expect more even complexion, skin tightening, pore minimization and wrinkle reduction.

**INTENSE PULSED LIGHT:** Intense Pulsed Light (IPL) treatments eliminate superficial red veins as well as discoloration and age spots on the skin's surface giving you a more even complexion.

**HYDRAFACIAL:** The HydraFacial is a multistep facial treatment that will cleanse, exfoliate, extract, and hydrate your skin giving you a youthful glow you will love!

**KERAVIVE:** Keravive is HydraFacial for your scalp. Cleansing and exfoliating the scalp will increase your hair growth to give your mane a fuller appearance.

**OXYGEN FACIAL:** Our bodies need oxygen and so does our skin. In this treatment a specialized wand delivers a stream of high pressurized oxygen to the skin along with a serum containing hyaluronic acid, plumping up skin cells and reducing the appearance of fine lines and wrinkles. This treatment is calming for inflamed, overtreated skin.

**OXYGENEO:** A facial that exfoliates the upper skin layer and opens clogged pores to smooth and renew the skin. This treatment also infuses nutrients and vitamins to nourish the skin.

**PCA SKIN PEELS:** PCA is the leader in chemical peels. PCA peels will reduce signs of aging hyperpigmentation, and the appearance of acne scarring by exfoliating dead skin cells and revealing a new layer of skin underneath.

**RADIOFREQUENCY SKIN TIGHTENING:** Radiofrequency skin tightening treatments are a comfortable way to improve the look and texture of sagging skin on the face and body. These treatments are also proven to reduce the appearance of cellulite.

**KYBELLA:** Kybella is the only FDA approved injectable treatment for adults that permanently destroys fat cells under the chin for a gradually improved profile.

**HAIR RESTORATION:** ProCell hair restoration treatments increase the blood flow to the hair follicles to stimulate growth and the PRP serum restores hair growth in dormant follicles.

**LASER HAIR REMOVAL:** Hair removal lasers use light energy to damage dark pigmented hair at the follicle which results in permanent hair reduction.

**WAXING:** This hair removal process uses a wax strip to effectively remove the hair from its root. Ideal for eyebrow shaping, hair removal above the lip, bikini area and more!

**DERMAPLANE:** A procedure that exfoliates the skin and removes dirt and vellus hair (peach fuzz) from the face and neck.

**EYELASH LIFT AND TINT:** An eyelash lift and tint will enhance the look of your natural lashes with a permanent curl and a subtle tint for beautiful natural looking eyelashes without makeup.

**SPRAY TANNING:** Experienced estheticians will give you that summer glow year-round because everyone looks better with a tan.

**MICROBLADING OF EYEBROWS:** Microblading is a form of a cosmetic semi-permanent makeup performed using a manual disposable handheld tool, composed with very fine needles resembling the shape of a blade (we call it a microblade), to hand draw each individual hair and simultaneously implant the pigment into the skin.

**CELLUMA LIGHT THERAPY:** The blue light therapy is used to treat acne, and the red lights reduce inflammation and minimize the appearance of wrinkles.
